SUMMARY

As a front end developer with strong communication skills, I have a passion for creating dynamic and intuitive user interfaces using cutting-edge technologies. With several years of experience in front-end development, I have honed my skills in designing and implementing complex web applications that meet business needs and user requirements. Overall, I am a driven and adaptable developer who thrives in fast-paced environments and is committed to delivering high-quality solutions that meet user needs.

EXPERIENCE

07/2022 - Ongoing

Blackfriars- Hybrid

Mid-level Front end developer

Futr AI

AI Chat bot using Chat GPT to enhance agent and user experience

- Working with a group of front end developers to produce a complete site rebuild which handles the settings and live chat for user agents.
- Working on a data driven site handling reading and manipulating server data.
- I have worked on some of the main features in the site including button answers (video, images, text), confidence settings, a preview bot which shows all agents responses including video and images and intelligent suggestion, powered by Chat GPT.
- Fixing ongoing bugs on all pages within the site.
- Using git to work on multiple features and bugs in a team and handling merge conflicts when they arise.
- Collaborating with others via peer programming and sharing knowledge on Slack.
- Working in an agile methodology with two week sprints.
- Tech stack- React query (caching data for speed), Zustand (global state, lightweight alternative to Redux), Typescript, React router, React, Formik for forms, Yup for validation, Material UI and Styled components when required.

07/2021 - 07/2022

Remote/Shoreditch

Junior Front end developer

Collective World Ltd

Digital Media agency

- Working with a wide variety of client websites including Hyundai UK national website.
- Creating bespoke pages for new Hyundai campaigns and making amendments to existing pages.
- Using various CMS's to update content.
- Using SASS with BEM to create maintainable,scalable CSS and using BrowserStack to test on all devices and platforms.
- Daily stand ups with project manager and using Jira to manage the deadlines and workflow.
- Using Docker, Bitbucket and Jenkins to run and build site amendments.
- Developing the Hyundai car configurator for the national site using Gatsby, React, React router, React hooks, Redux and Styled components.

06/2021 - 07/2021

Remote

Front end developer

Ocado- fixed term contract full time.

Online retail company

- Working with the design team to update keys part of the Ocado Fetch website using CSS, HTML and Contentful from XD designs from the Graphic design team.
- Using Contentful, Trello, Abode Creative Suite and Slack to make a high volume amount of website updates to specified deadlines.
